Telephone: 0703 Office: 2072C

Title of Change: Baseline Clean-up

1. On 5a & 5b, Change Purify baseline for Sun variant back to version 4.1. An emergency upgrade to 4.5.1 for Sun was done in the EDF. It was not intended to upgrade the baseline, as this requires a PSR. The upgrade is in progress, but has not been PSRd

- 2. Standardize naming conventions for Sybase SQL Server Monitor. SQL Monitor Server and SQL Monitor are identified in the current baselines. These are the same products. All variants should use the name "SQL Server Monitor Client/Server", as both the client & server portions are installed wherever Sybase SQL Server or Sybase Adaptive Server is installed. The 5b baseline indentifies only a Sun variant. Variants are needed for SGI & HP. These variants should be added.
- 3. Correct the HW/SW map configurations relating to "SQL Server Monitor Client/Server". "SQL Server Monitor Client/Server" should only appear on hosts where Sybase Adaptive Server or Sybase SQL server is installed. It appears that SQL Monitor only is specified for HPs; both SQL Monitor and SQL Monitor Server is specified for SUNs; and neither is specified for SGI where a SQL Server implementation is identified. The known Sybase SQL Servers/Adaptive Servers are identified in attachments.
- 4. (5a only unless noted) Remove items associated with removal of AMASS IBM 3590 drives. With removal of the 3590 drives from the project., the following items should be removed from the baseline.:
- a. AML Mgt. Unit
- b. DAS
- c. Microcode for IBM 3590 (5a & 5b)
- d. OS/2 Warp
- e. OS2 Fixpak
- 5. Product vendor changes:
- a. Commercial Secure Shell vendor Data Fellows changes to F-Secure Corporation
- XRP-II vendor changes from HTG Corp. to SolutionBank
- c. (5b only) IQ software vendor should be Sterling Software, not Sun Microsystems.
- d. The vendor for Autosys products and DBVision is currently Computer Associates, Inc., CA, acquired Platinum.
- e. The DCE Cell Manager vendor should be changed from Dascom to Tivoli Systems.
- f. The vendor for Microcode for 9840 should be StorageTek not EMASS.
- g. The vendor EMASS is now ADIC. Replacement of EMASS with ADIC.
- 6. Two IQ versions are specified: 5.5 & 5.5.01. Version 5.5.01 should be the only version.
- 7. (5B only) Remove EMACs version 20.3 as SGI/Sun variants, as this upgrade will not be planned at this time.
- 8. Remove comment from all Autosys, Autosys Xpert & Autosys Remote Agent entries. Comment relates to version not longer supported.
- 9. Remove comment from SQR entry (s). Comment is not appropriate to product refers to another product.
- 10. Remove one of the Sybase Central entries: version 11.5. The only version that should be identified is 3.0.0.. This is a new product, not an upgrade.
- 11. Consolidate 2 heading entries for Firmware, MC and Firmware, MC. Only a space differentiates these. Only one heading entry is needed.(5a only)
- 12. Change the primary/secondary (P/S) indicator for m0mss16 & m0mss15. m0mss16 should be designated as the Primary (P). m0mss15 should be designated as the secondary.
- 13. Remove the Function Designation "iFOR/Is License Server" from I0msh03 and t1msh01. Product removed from baseline.
